

The Art of Repetition

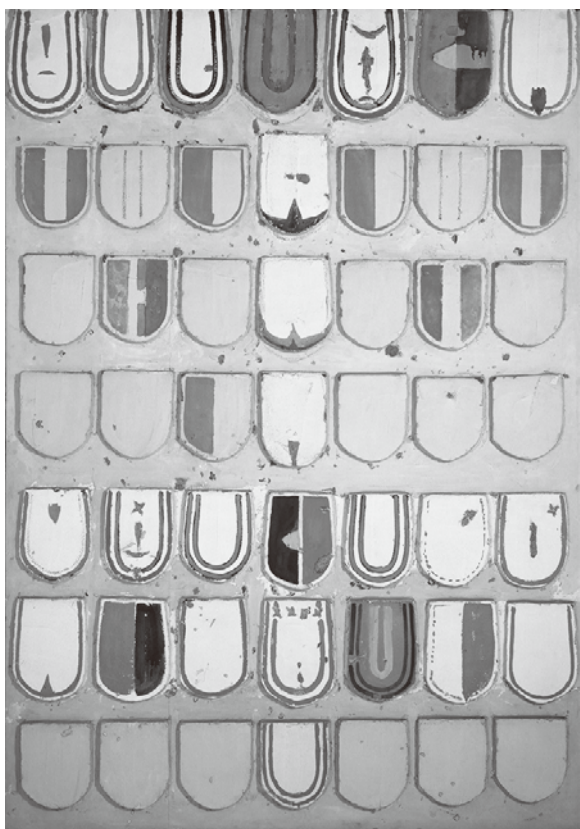

June 10 - September 10, 2015

Many works have repetition of images within themselves.

Repetition of the same form, gradual variation of the form and color or repeating forms under certain rules makes various expressions. Moreover, repeated patterns can build up a work itself.

What kind of art works does repetition make? What or how is repeated in art works?

In this exhibition, we would like to enjoy highlighting repetition with 50 works by 33 artists, which is employed quite significantly as an approach to make forms art.
